To use this function, place first the empty container on the scale, and press the "On/Tare" touchpad under the LCD display. The scale will switch on and indicate 0g or 0.00 oz. Add the ingredient to weigh. The weight indicated on the display is the weight of the ingredient added inside the container!

## ERROR INDICATION

If the display shows symbols randomly or if the scale doesn't turn off automatically, it means that your scale has a problem (wrong initialization or weighing error).

Remove any object from the scale and wait for it to turn off.
